

Bug Report - Google Translate

Application: Google Translate - <https://translate.google.com/>

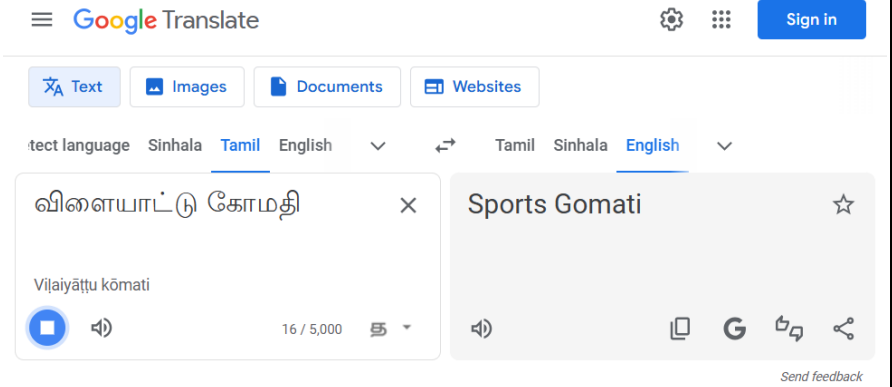

1)

Bug ID	001
Title	Additional words are appended when translating numerical inputs
Description	In some numerical translations additional unwanted words are appended at the end of the translation
Pre-Conditions	<ol style="list-style-type: none">1. User has internet access2. User has been navigated to https://translate.google.com/
Steps to Reproduce:	<ol style="list-style-type: none">1. Select the source language - English2. Select the target language - Sinhala3. Enter a numerical text as source input
Test Data	"451281", "1222", "10157"
Environment	Browser - Version 140.0.7339.80 (Official Build) (64-bit)
Expected Result	The numerical input should remain the same in the target language without additional words.
Actual Result	In some cases, additional text is appended at the end of the number (e.g., 451281 නිෂ්පාදන, 10157 ආර්.)
Evidence	

	 <p>The screenshot shows the Google Translate web interface. The source language is set to English and the target language is Sinhala. The input text is '1222'. The output shows '1222' in Sinhala script (දුරකථන) and a note that it is '(irigisi)'. There are icons for voice input, output, and a 'Send feedback' link.</p>
	 <p>The screenshot shows the Google Translate web interface. The source language is set to English and the target language is Sinhala. The input text is '10157'. The output shows '10157' in Sinhala script (දුරකථන) and a note that it is 'är.'. There are icons for voice input, output, and a 'Send feedback' link.</p>

Bug ID	004
--------	-----

Title	Handwriting Input Misinterprets Random Symbols
Description	When unclear random symbols are drawn/ doodled, they are identified as valid characters
Pre-Conditions	<ul style="list-style-type: none"> User has internet access User has been navigated to https://translate.google.com/ Text tab has been selected
Steps to Reproduce:	<ol style="list-style-type: none"> 1. Select the source language - English 2. Select the target language - Sinhala 3. Click the dropdown at the bottom right corner of the source input field (right next to the keyboard icon) 4. Select the Handwrite option from the dropdown 5. Draw random symbols – Doodle a flower on handwriting panel 6. Click enter button at the end of the handwriting panel or click on the relevant suggestion from suggested words
Test Data	
Environment	Browser - Version 140.0.7339.80 (Official Build) (64-bit), Speech-to-text with microphone enabled
Expected Result	Input should not be identified as letters
Actual Result	Input is identified as letters and suggested to enter
Evidence	 <p>The screenshot shows the Google Translate web interface. At the top, there are tabs for Text, Images, Documents, and Websites. Below these, the source language is set to English and the target language is Sinhala. A handwriting input panel is open, displaying a blue flower doodle. Below the doodle is a keyboard suggestion bar with letters B, a, o, m, b, O, Bo, Bi. The interface also includes a microphone icon, a 'Send feedback' link, and a settings icon.</p>
